

Athanasios Karezos

BACKEND DEVELOPER

Thessaloniki, Greece

☎ (+30) 694 837 0217 | ✉ thankarezos@gmail.com | 💻 [thankarezos](#) | 🌐 [thankarezos](#)

Summary

Backend developer with hands-on experience designing and operating .NET / C# services in production: REST APIs, database-driven applications, validation and business logic, authentication, and customer-facing business systems. Comfortable across the full delivery stack — Linux servers, Docker / Docker Compose, Nginx, GitLab CI/CD pipelines, and deployment troubleshooting.

Cross-stack reach with React / TypeScript on the frontend, plus exposure to Java, Node.js, and Python. Strong troubleshooting mindset for systems-level issues — reading logs, comparing environments, and debugging container, network, and OS behavior.

Work Experience

arx.net

Thessaloniki, Greece

BACKEND DEVELOPER

Oct. 2023 - Present

- Build and maintain backend services and REST APIs in .NET / C# (ASP.NET Core, EF Core) powering business systems in real production environments.
- Design database-driven applications with validation logic and authentication; integrate with SQL Server, PostgreSQL, and Oracle (legacy).
- Set up GitLab CI/CD pipelines for build, test, and deployment; write unit and integration tests with Testcontainers.
- Containerise services with Docker / Docker Compose and operate them on Linux servers behind Nginx; troubleshoot deployment and production issues.

Projects

arx.net

Thessaloniki, Greece

ASMA — SAAS ASSET MANAGEMENT PLATFORM

Aug. 2025 - Feb. 2026

- Team lead and sole backend developer on a SaaS asset management platform; drove key technical decisions across both backend and frontend; coordinated project work in absence of a dedicated PM.
- Owned backend architecture, multi-tenant database design, RabbitMQ-based notifications, testing strategy, CI/CD pipeline, and production deployment.
- Built with ASP.NET Core and React; data layer on PostgreSQL with RabbitMQ for messaging; containerised with Docker and operated on Debian behind Nginx.

Education

International Hellenic University (formerly ATEI of Thessaloniki)

Thessaloniki, Greece

B.SC. IN COMPUTER ENGINEERING

Oct. 2018 - Sep. 2026 (expected)

Skills

Backend	.NET / C# / ASP.NET Core, REST APIs, async/await, Dependency Injection, EF Core / LINQ / Migrations, FluentValidation / DTOs, JWT auth, Unit & Integration Testing (Testcontainers), Legacy VB.NET WinForms migration, Node.js, Java, Python
Databases	Microsoft SQL Server, PostgreSQL, Oracle (legacy), Redis, SQL
Data & ML	scikit-learn, TensorFlow, ML fundamentals
Frontend	React, TypeScript, JavaScript, Vite, three.js, HTML, CSS
DevOps & Infra	Docker, Docker Compose, Nginx, GitLab CI/CD, Git, Jira, Linux (Debian / Arch), Proxmox, RabbitMQ, Homelab
Networking	OpenWrt, DNS management, managed switches, structured cabling, home network design
Hardware & Tools	C, Arduino, ESP32, 3D printing, Fusion 360, Blender (basic), LaTeX
Languages	Greek (native), English (fluent)

Honors & Awards

Mar. 2023 **1st Place — Local Round**, EESTech Challenge Hackathon (Mobile App Development / Gamification, Firebase)

*Thessaloniki,
Greece*

Extracurricular Activity

IEEE Student Branch — International Hellenic University

Thessaloniki, Greece

MEMBER & WEBMASTER

2022 - 2026

- Served as webmaster for two years, maintaining the branch website and member-facing tooling.
- Designed and built an event registration application (ASP.NET Core, React, SQL database) used by the branch for three years to handle sign-ups for talks, workshops, and competitions.

Interests

Personal homelab with self-hosted services and VPN-isolated containers. Home networking projects. Smart-home automation. Linux customisation (Arch / KDE) and system-level experimentation. Building and running an HTPC for media. PC gaming and hosting game servers for friends.
